

# The Big Move

**New address details for  
Siemens Mechanical Drives**

**SIEMENS**

# A major factory relocation

We are delighted to announce that Siemens Mechanical Drives has moved into a new dedicated assembly and service centre; a purpose built factory at Navigation Park in Stourton, Leeds which will bring significant long-term benefits to our customers, employees and partners.

At Siemens Mechanical Drives we pride ourselves in the delivery of high quality, flexible and cost-effective technical solutions. The investment in a new facility will enable us to realise a significant step change in our operations and thereby increase the value proposition we will be able to offer our customers and partners. This will be realised through the adoption of lean production cells, improved material flow, increased production capacity and material handling.

As well as investing in our facility, we continue to invest in people. We have taken on more apprentices to enhance our long-term

bank of skilled employees. In parallel, employees in all areas of the business are engaged in further developing and improving systems and processes. With respect to our customers in particular, we will be holding technical seminars and conferences at the new facility, covering the broader Siemens drive train solutions, incorporating variable speed drives, motors, couplings and gearboxes.

One area of particular growth at the new site will be around service. Although we have a well established reputation for our traditional products, the areas of wind and rail service are developing fast.

Winergy drive units and Flender rail gear units/couplings installed and operating in the UK have increased dramatically in recent years. The new factory layout improves materials handling, and additional capacity will enable us to offer an improved turnaround of maintenance, repair and overhaul for these products – benefiting our customers enormously.

## **Formal Opening**

We're looking forward to showing you our new facilities and we'll be holding a formal opening of the new factory in January 2011. We'll be in touch again soon with your personal invitation to visit us.

# SIEMENS

## Siemens Mechanical Drives

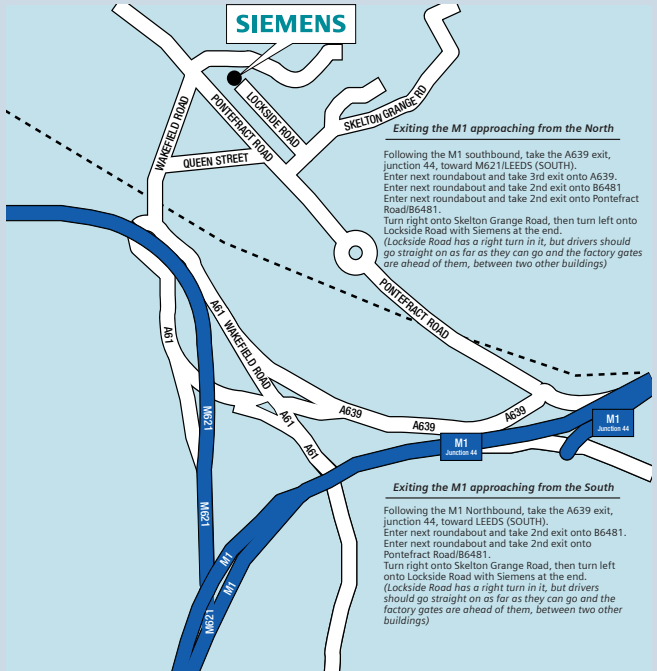

Unit 5  
Navigation Park  
(Off) Lockside Road  
Stourton  
Leeds  
LS10 1EP

Reception : 0113 385 2500  
Fax : 0113 385 2513

The office is situated just off junction 44 on the M1 motorway. The nearest hotel is only a few minutes away. Should you wish to stay, please contact the Queens Hotel on 0113 270 4519 to make a reservation.

Location map of new factory

### Exiting the M1 approaching from the North

Following the M1 southbound, take the A639 exit, junction 44, toward M62/LEEDS (SOUTH). Enter next roundabout and take 3rd exit onto A639. Enter next roundabout and take 2nd exit onto B6481. Enter next roundabout and take 2nd exit onto Pontefract Road/B6481. Turn right onto Skelton Grange Road, then turn left onto Lockside Road with Siemens at the end. (Lockside Road has a right turn in it, but drivers should go straight on as far as they can go and the factory gates are ahead of them, between two other buildings)

### Exiting the M1 approaching from the South

Following the M1 Northbound, take the A639 exit, junction 44, toward LEEDS (SOUTH). Enter next roundabout and take 2nd exit onto B6481. Enter next roundabout and take 2nd exit onto Pontefract Road/B6481. Turn right onto Skelton Grange Road, then turn left onto Lockside Road with Siemens at the end. (Lockside Road has a right turn in it, but drivers should go straight on as far as they can go and the factory gates are ahead of them, between two other buildings)

## New General Manager

Simon Nadin joined the Mechanical Drives Division in June and has been co-ordinating the new factory move as well as getting familiar with the Flender brand range. With a background in production and process management, Simon's clear thinking has already been of significant benefit to the relocation.

He joined Siemens in 1988 and was previously Business Excellence Manager at the world drives factory in Congleton. Simon's experience means he is ideally placed to help develop Siemens offerings in growing industry areas such as wind energy, rail and airports.

## New contact details

The new Siemens factory is at the following address:

### Siemens Mechanical Drives

Unit 5, Navigation Park  
Lockside Road  
Stourton  
Leeds LS10 1EP

Tel: 0113 385 2500  
Fax: 0113 385 2513  
email: [anna.grimshaw@siemens.com](mailto:anna.grimshaw@siemens.com)

Please ensure you amend your records accordingly.

The switchboard is operational between 8.30am and 5.00pm Monday to Thursday, 8.30 to 4.30 Friday.
